

 **Invivo**
Clinical Solutions for MRI

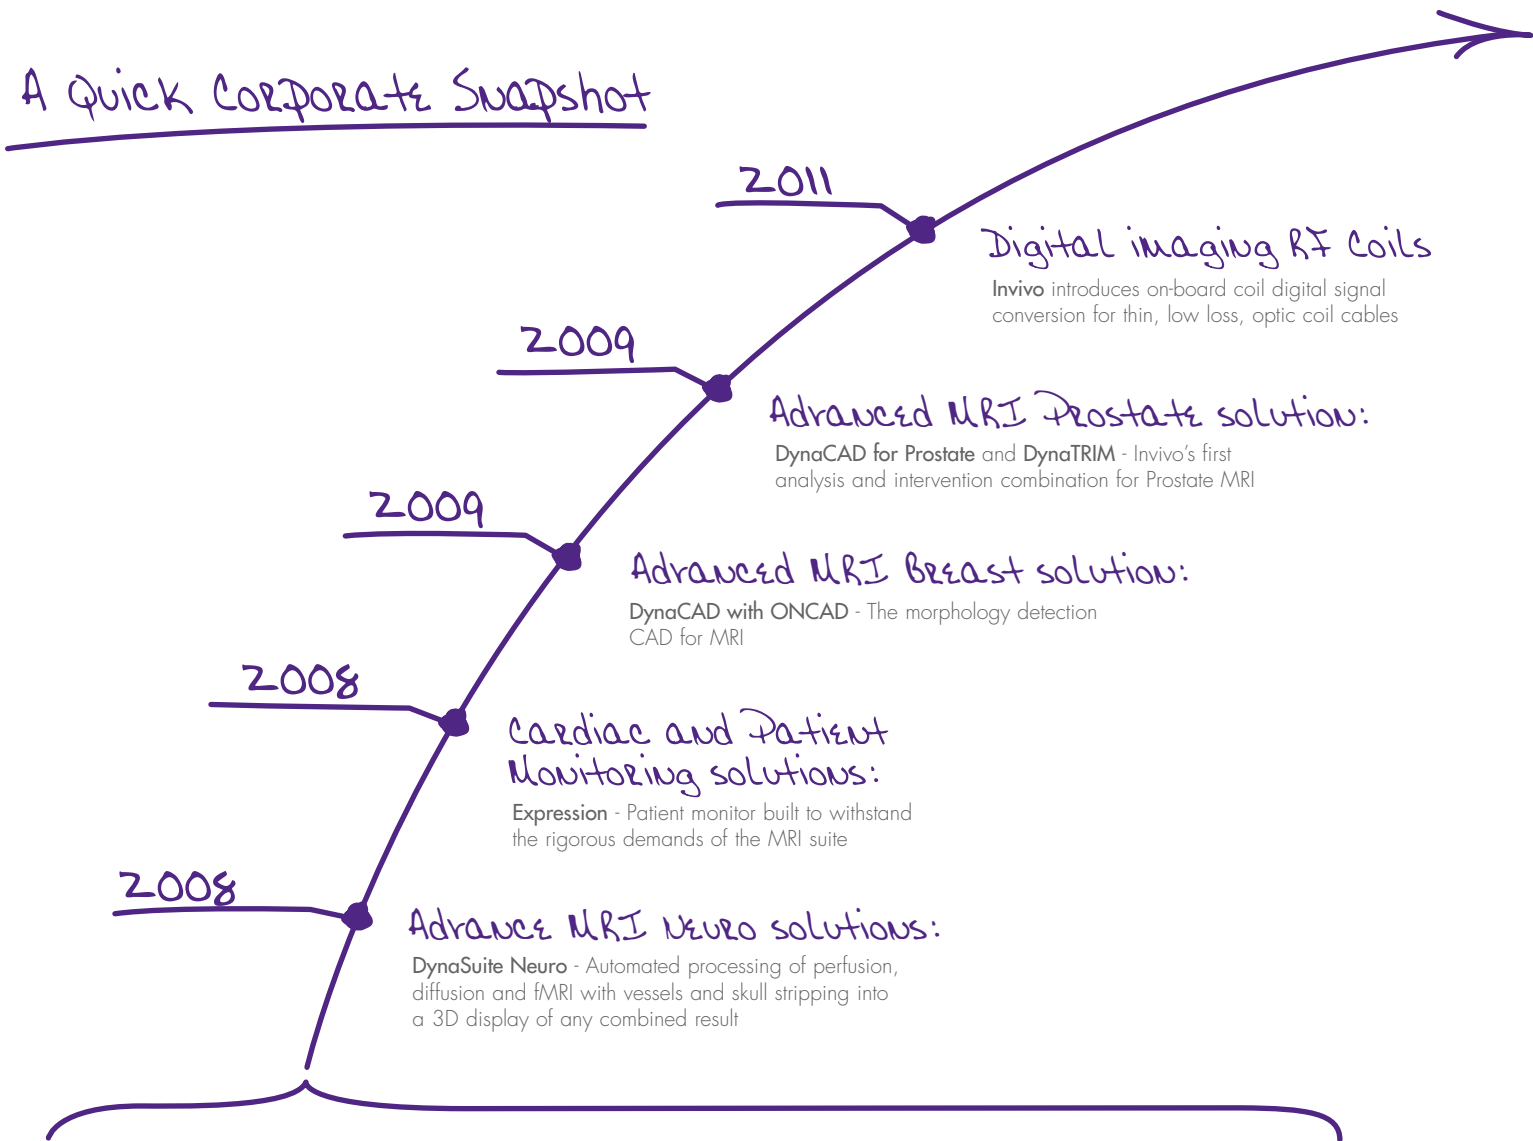

better images mean better results

Welcome to the leading MR clinical solutions company always inspired by a better way!

Welcome to  **Invivo**

A Quick Corporate Snapshot

In 2004, three long-term players in the MR marketplace joined forces to create leading MRI clinical solutions!

Invivo is committed to providing technology solutions to keep pace with the needs of a growing healthcare market. Focusing on a better way for you and your patients, Invivo offers solutions that enable you to be more confident and more accurate in your clinical practice.

The next innovative milestone

I Orthopedic MRI

Invivo is a world leader in Innovative MRI coils

"Since the purchase of Invivo's high-resolution multi-channel coils, I have seen faster scan times, increased patient throughput and enhanced image quality. With combined MRI coil excellence and clinical superiority, Invivo has the expertise to enhance patient care and satisfy referring physicians."

Christopher Govea, M.D., Houston Progressive Radiology Associates, PLLC

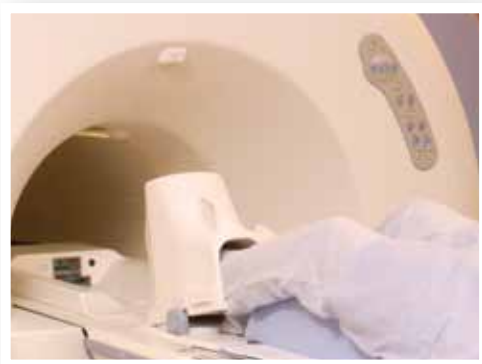

Want to provide exceptional image quality while increasing diagnostic value?

The sophistication of Invivo orthopedic imaging products is continually improving, as a result of our strong collaborations with customers and leading MRI system manufacturers.

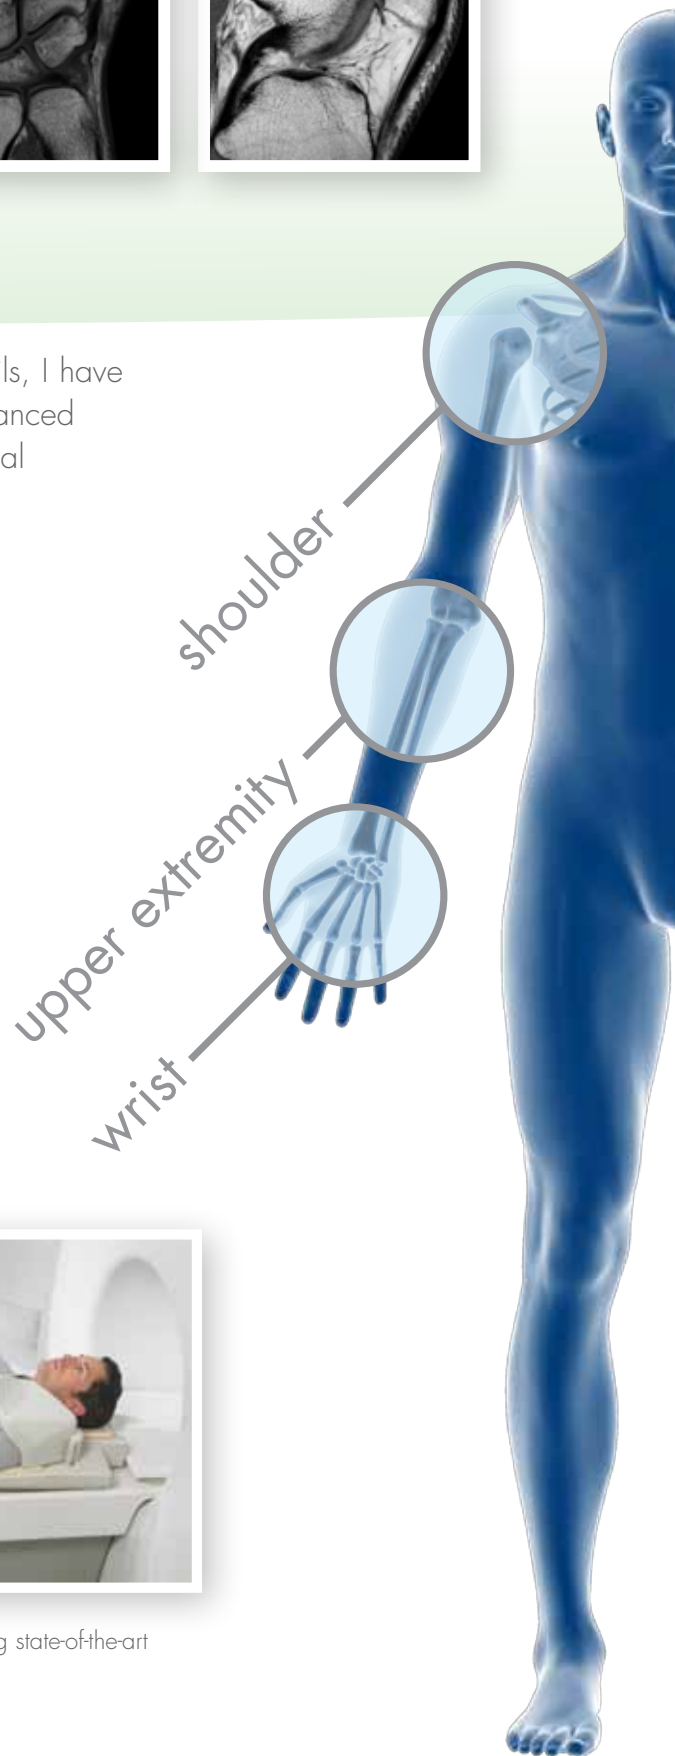

Our dedicated team of RF and mechanical engineers works in tandem to enhance coil performance, resulting in innovative products that fit the needs of clinicians and their patients, and also enhance ROI for the facility.

Protect your investment

Your investment is protected by a three-year warranty on coils.

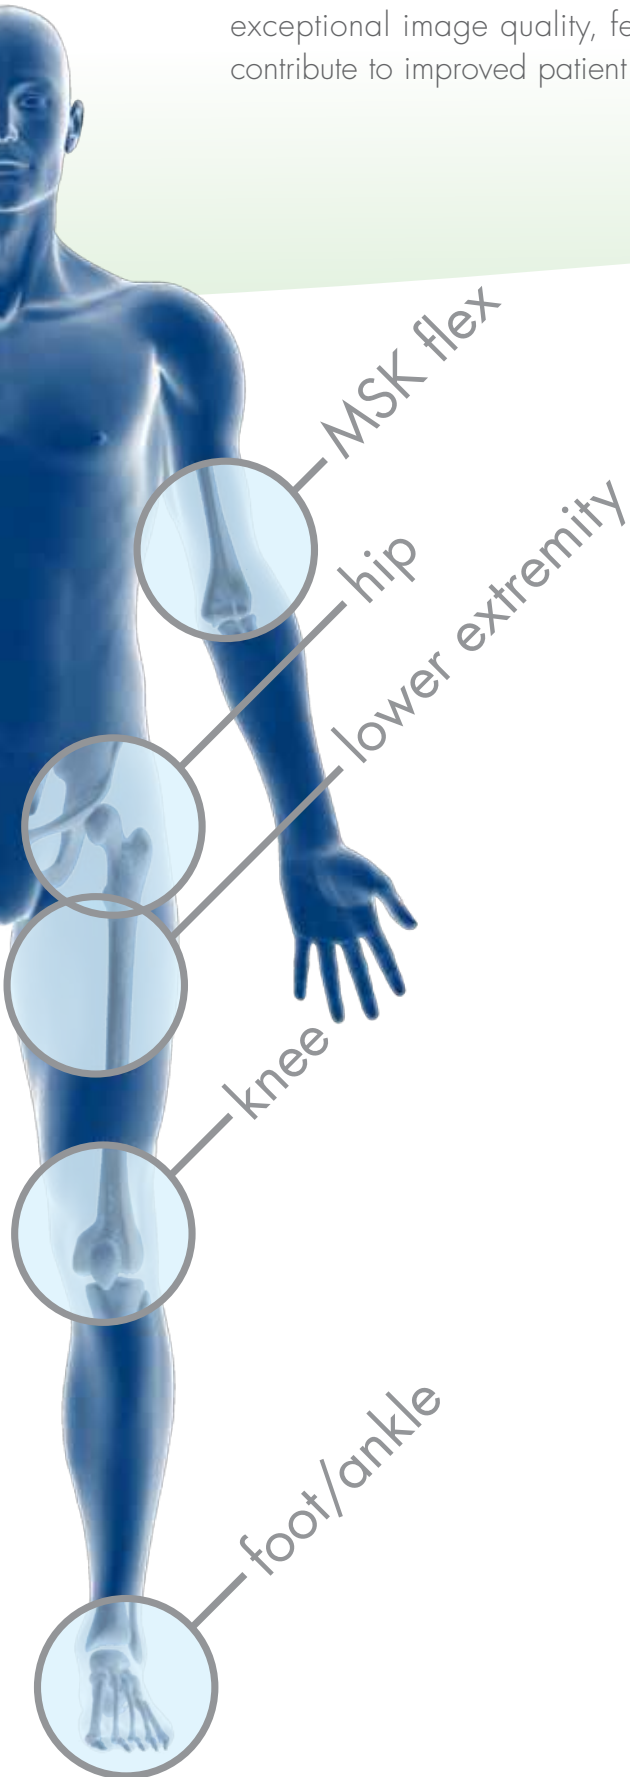

Invivo coils are designed with superb patient comfort in mind, while incorporating state-of-the-art technology, that enables high quality imaging results.

The benefit of moving up to today's orthopedic coils

The latest advancements in technology and higher channel count coils lead to fast scans, exceptional image quality, fewer repeat studies, and enhanced patient comfort, all of which contribute to improved patient care and more efficient utilization of your MRI system.

Better images mean better results

For orthopedic imaging, Invivo has you covered. Invivo offers specialized array coils for upper and lower extremity imaging, as well as general purpose body flex coils for a broad range of performance and value driven orthopedic imaging solutions.

Invivo has you covered!

Large array of orthopedic MRI coils:

8 - Channel Shoulder Array

8 - Channel Wrist Array

8 - Channel Upper Extremity Array

8 - Channel Large GP Flex Array

16 - Channel Knee Array

8 - Channel Foot and Ankle Array

Breast MRI

Want the confidence and cost savings of a single-source imaging provider?

“ONCAD shortens my reading time in complex cases.”

David Brousseau, M.D., Ph.D., Director of Imaging, Los Angeles Center for Women’s Health, CA

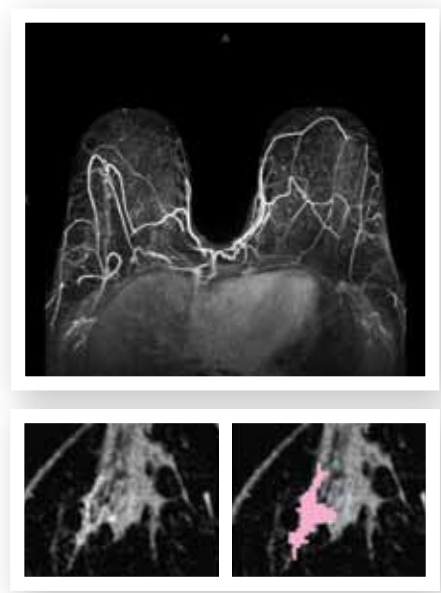

Breast surgeons and oncologists are faced with many complex questions, and the appropriate answers are crucial in providing excellent patient care. Mammography, ultrasound and clinical breast exams don’t always provide the complete picture. Now you can have access to more information on which to base your diagnosis and treatment plan, to increase your confidence.

Our MRI Breast Solution

Invivo offers a full range of breast coils, in combination with DynaCAD with ONCAD, to produce high quality images, fast image processing and streamlined workflow for most MR systems. Our comprehensive solutions meet varied price points.

Benefits of Breast Solution from Invivo:

- Large portfolio of high quality coils to meet different MR system needs
- Superb image quality with exceptional patient comfort
- Easy access and simplified software for interventional procedures
- DynaCAD with ONCAD, for consistently reliable results and an automatic second check during the MRI review process
- Invivo Marketing Breast Press Kit provides strategic tactics and customizable marketing materials to launch a site-specific campaign to grow breast MRI in your facility

Prostate MRI

Want to increase the utilization of your MR system with the Prostate MRI Solution from Invivo?

“We were early adopters of the DynaCAD for Prostate/DynaTRIM family of products, and our learning curve was swift and sure. With little marketing effort, we developed a regional presence in prostate cancer diagnosis and risk assessment.”

Robert Princenthal, M.D., President, Rolling Oaks Radiology, and Co-director of Prostate and Women’s Imaging, Thousand Oaks, CA

Urologists constantly face the dilemma of patients with elevated and/or rising PSA levels and negative TRUS-guided biopsy results. With patients in an uncertain state, wouldn't you like to have an alternative clinical solution?

DynaCAD for Prostate with DynaTRIM from Invivo is an analysis and interventional system that allows urologists, under MR guidance, to target specific suspicious areas in the prostate under MR guidance.

Our Prostate MRI Solution:

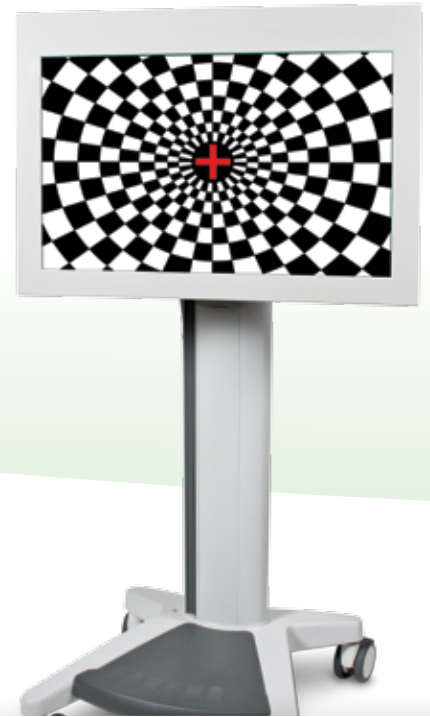

- DynaCAD for Prostate and DynaTRIM are an award-winning combination
- A software and hardware combination that's easily added into clinical workflow for both diagnostic imaging and MR-guided intervention
- Services that increase utilization and revenue can be added to most MR scanners
- Invivo Marketing Prostate Press Kit provides strategic tactics and customizable marketing materials to launch a site-specific campaign to grow prostate MRI in your facility

Advanced Neuro MRI

Want to provide valuable MRI information to help neurosurgeons AND neurologists?

“NeuroQuant is a powerful tool that allows me to gauge whether a patient’s brain atrophy is abnormal for his or her age. This atrophy has been shown to be a sensitive marker of Alzheimer’s Disease.”

Michael S. Rafii, M.D., Ph.D., Director, Memory Disorders Clinic
Assistant Professor of Neurosciences
Associate Medical Director, Alzheimer’s Disease Cooperative Study
Attending Neurologist, Shiley-Marcos Alzheimer’s Disease Research Center
University of California, San Diego, CA

Advancements in MRI Technology are revolutionizing the way hospitals plan for surgical procedures and evaluate degenerative diseases.

fMRI has changed the ways in which neuroradiologists interpret MRI studies and neurosurgeons plan for procedures. These improvements benefit patients by providing increased confidence and reducing the time spent in surgery. Structural MRI with volumetric quantification provides more information on which to base a diagnosis.

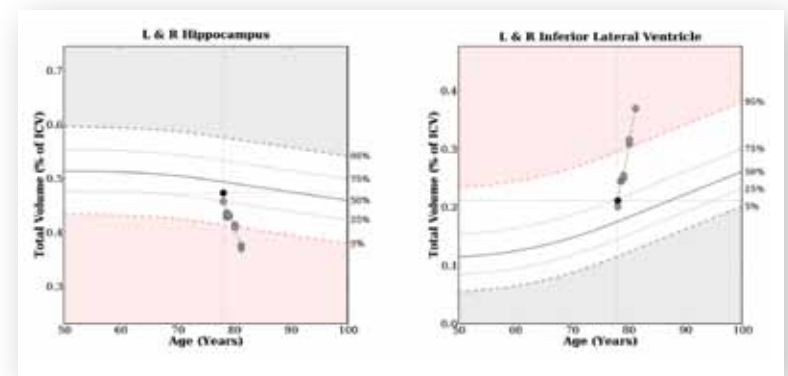

Our fMRI Neuro Solution

Invivo now provides a complete clinical solution including head coils, an ESys fMRI stimulus system and DynaSuite Neuro. All components by Invivo are multi-vendor compatible. Additionally fMRI is reimbursable, bringing these important applications to more patients than ever before.

Our NeuroQuant Structural MRI Solution

DynaSuite Neuro with NeuroQuant provides timely and confident care by returning a new, full-volume spatially corrected and anatomically labeled dataset with two printable patient reports. Results enable neurologists, radiologists, and clinical researchers to quantify the volume of the hippocampus and other key neuro structures. The Invivo Marketing Neuro Press Kit provides strategic tactics and customizable marketing materials to launch a site-specific campaign to grow this advanced neuro MRI in your facility.

MR Patient Care

When monitoring revolves around the patient, MRI exams involving complex sedation, anesthesia or ICU are simplified. With Expression, Essential and Precess, you work smarter, not harder.

Expression

Safe. Smart. Simple.

Quality Designed In

Invivo has the most comprehensive family of wireless monitoring systems which are designed, engineered, and manufactured from the onset to support reliable operation over the life of your investment.

Uninterrupted Monitoring

Invivo wireless creates smooth transitions reducing the risks associated with patients while relieving the time pressure on your staff caused by switching sensors and monitors during the exam process.

Improve Resource Management

Increase staff and exam efficiency enabling more time for patient interaction. This exclusive solution helps you discover more ways to meet your business objectives by making more efficient use of your equipment.

Focus on Satisfied Patients

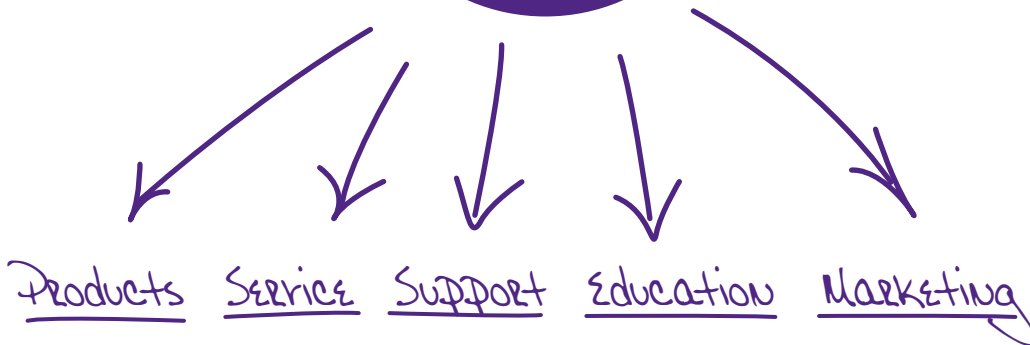

Put patients at ease with a fast exam and improved mobility while reducing discomfort of repeated sensor attachments.

The 32-channel Cardiac Coil, when combined with Invivo monitoring, provides improved images and efficiency during complex MR stress studies and cardiac cases.

Invivo Value-Added Solutions

As a world leader in innovative MRI clinical solutions, Invivo provides your practice with start-to-finish support, from our value-added customer education programs, sales, marketing, and technical support to our industry leading MRI-related products.

Invivo has factory-trained Field and Remote Service Specialists that offer the technical support you need, including troubleshooting, parts, and competitive fixed-rate factory repairs, to help you through any issues that might arise. Our Gold, Silver, and Express service contracts and extended warranty options help enhance a smooth, cost-effective service experience.

In addition to expert on-site and remote technical support when needed, Invivo supplies marketing press kits for key products. These kits give you the tools you need to promote your new services to the community and to referring physicians.

When updates and new applications become available, Invivo hosts training and educational opportunities to ensure continuity in your busy practice. These include workshops and webinars for key applications. Invivo is also represented at major conferences and meetings, so you can speak directly with knowledgeable, helpful members of the Invivo team.

Invivo truly provides start-to-finish, head-to-toe coverage, to benefit both you and your patients!

Complete Customer Care

A world leader in innovative MRI solutions, Invivo is focused on your clinical needs. We take pride in providing exceptional customer support and clinical education, to create a true collaboration with you. Realizing that better support means better results, our TechPoint customer care provides:

- Remote technical support, for fast, easy support no matter where you are
- On-site applications training, to keep you on top of applications and updates
- Rapid turnaround time on repairs, to reduce downtime in your practice
